About Us

At EVA Pharma, we pride ourselves on our innovation and our expertise, built on a heritage spanning over a hundred years.

One of the leading branded generic pharmaceutical manufacturers in the MENA region, we operate in branded generics, OTC and herbal medicines, offering 165 pharmaceutical products covering various therapeutic classes, including neurology, psychiatry, cardiovascular medicine, orthopedics, gastrointestinal medicine, pediatrics, urology and dermatology.

Our cutting-edge facilities within Egypt are internationally recognized for innovation and the highest quality standards and have earned the stamp of approval from international and regional authorities, including the European Medicines Agency, Health Canada, the Saudi Food and Drug Authority, and regulators from the UAE and the GCC, enabling EVA Pharma to act as a contract manufacturer for some of the leading companies around the globe.

In addition, EVA Pharma has been recognized as the partner of choice by several multinational companies in Europe over the past six years through out-licensing the company's unique EU-CTD dossiers, which are now registered in multiple European countries.

Expanding Access to Vaccines

At EVA Pharma, we are looking to serve unmet needs in Egypt and other African countries by boosting accessibility to COVID-19 vaccines.

Our new vaccine manufacturing site in Cairo, Egypt, which is currently under construction, will help meet these needs.

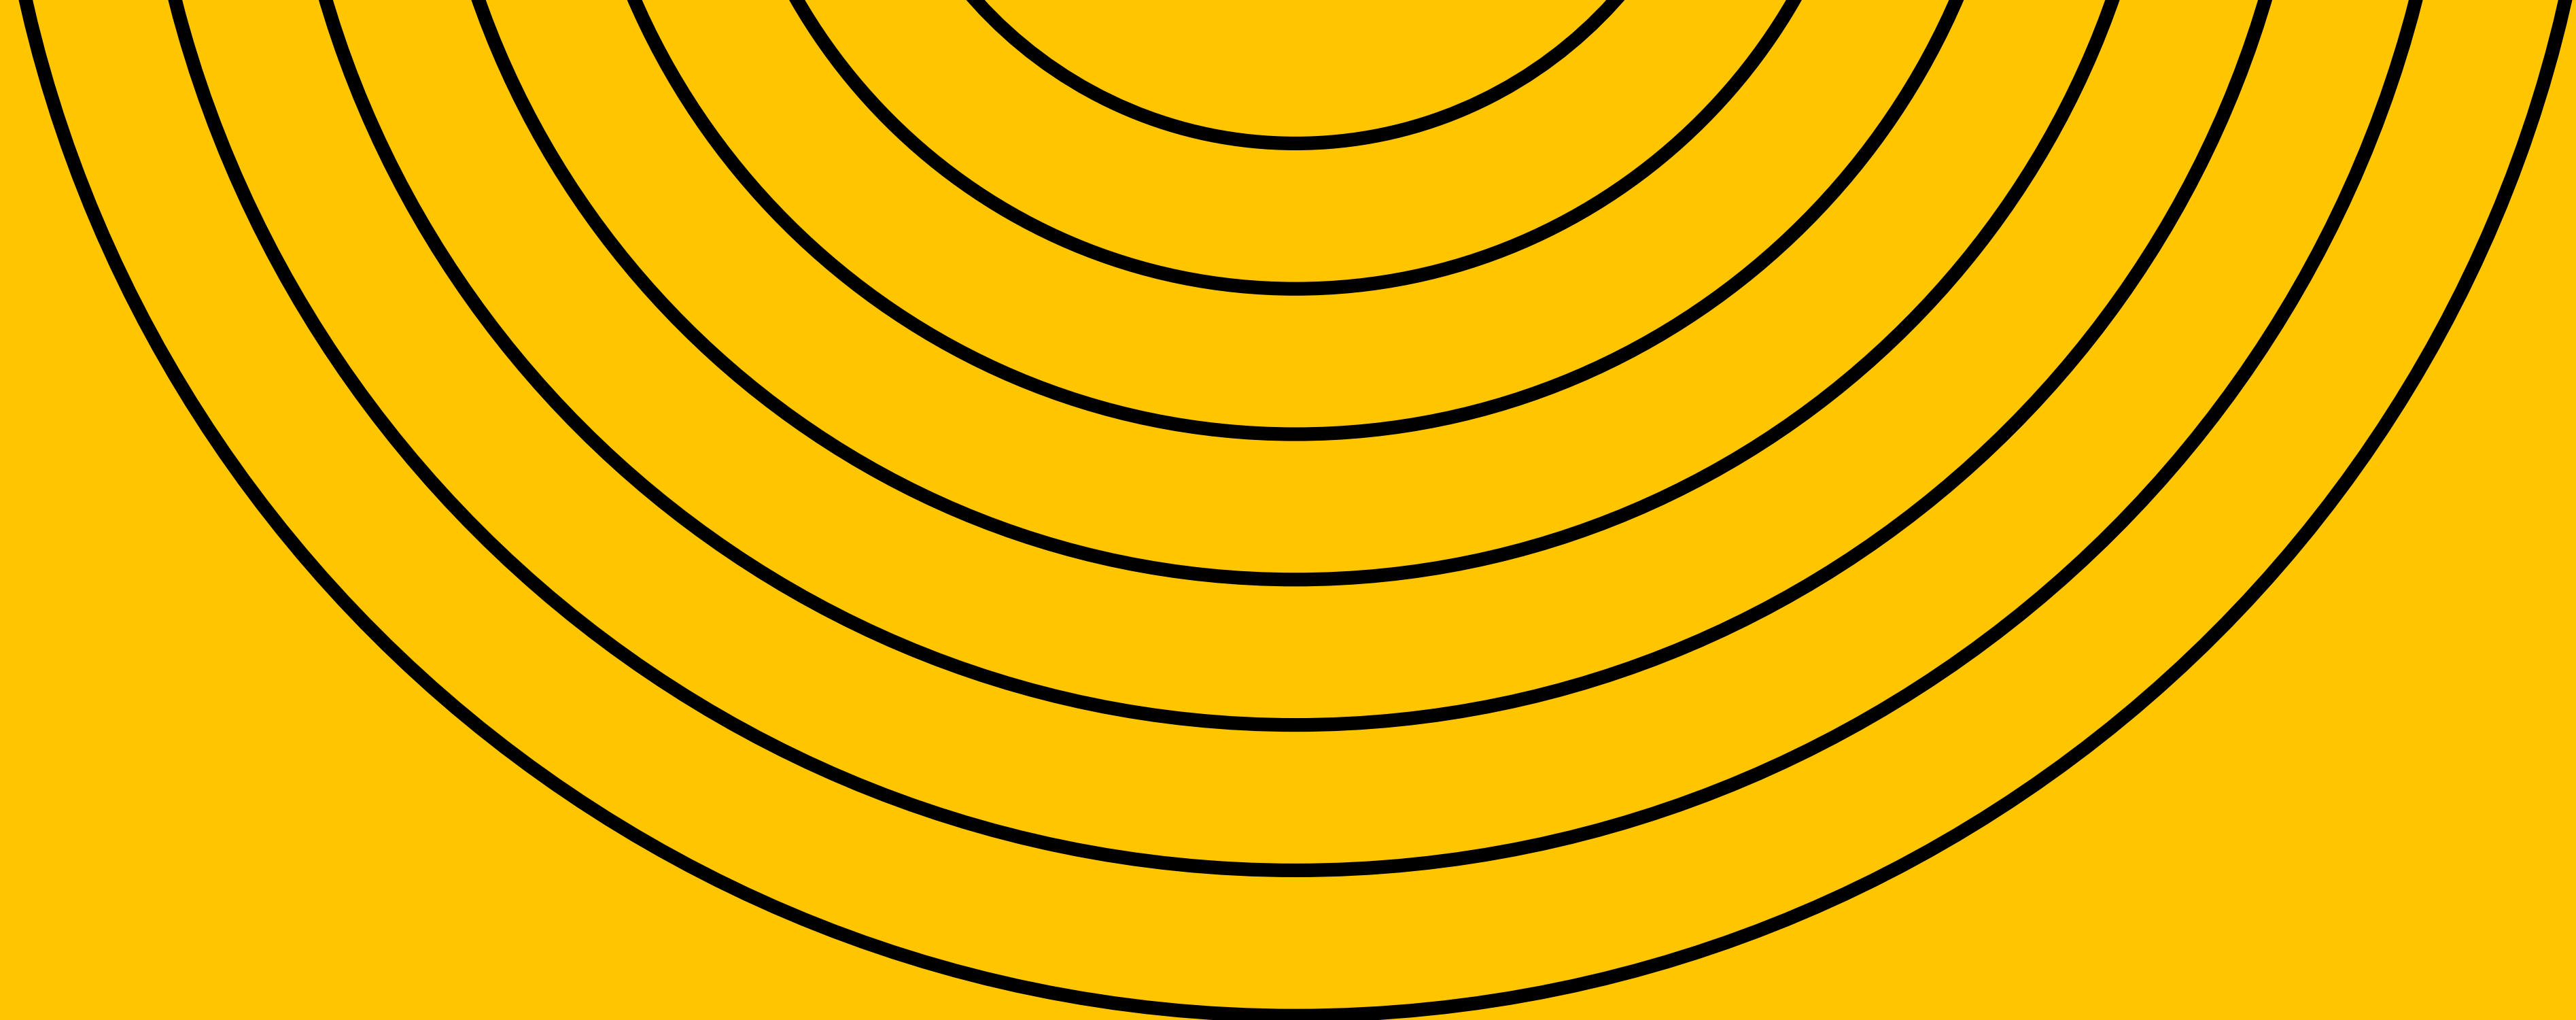

We are looking to develop capacity for:

- viral vector vaccines
- mRNA vaccines
- inactivated vaccines
- egg-based vaccines

Partner With Us

We are particularly interested in partnerships that provide tech transfer, and in supplying downstream capacity to fill and finish vaccine production.
